Hi, I purchased a HP Laptop, HP Pavillion Gaming Laptop - 15- ec2150ax, on 20-12-2022, with Product number: : 589X6PA#ACJ and Serial Number 5CD209BTHG. My laptop is facing several issues, when i do some heavy work on laptop, the performance just randomly drops. for example when i play valorant, my usual fps is 130-140 but now, for 5 minute the fps just drops below 20 and the laptop is entirely in hanged state. It has not even been 2 years since i purchased this laptop and its already not performing well, i hope you can fix this issue of mine.
